WORK EXPERIENCE

Software developer
Waveaxis technologies Pvt Ltd

06/2022 - 07/2023   *Bengaluru*

Achievements/Tasks

- **Product Enhancement:** Led the development of key features and improvements, resulting in a more user-friendly and feature-rich product, leading to increased user engagement and satisfaction.
- **Performance Optimization:** Actively harnessing the power of MERN stack best practices to refactor and optimize critical components. Boosted page loading speed from 825 ms to 520 ms by implementing effective memoization techniques and incorporating lazy loading in React. On server side implemented caching and pagination techniques in Node.js to optimize API performance, reducing response times. Utilized node-cache for efficient in-memory caching and structured pagination logic to manage large datasets. Improved user experience by delivering faster and more scalable API responses.
- **User-Centric Design:** Utilized **React** to create intuitive and visually appealing user interfaces, resulting in enhanced user experience and increased user retention rates.
- Adaptable to embrace new technologies based on client preferences, I prioritize robust search optimization for websites. Recognizing the significance of SEO, we transitioned from React to Next.js, leveraging its server-side rendering capabilities to enhance the website's search engine optimization
- Proficient in utilizing Cypress for automated unit testing, demonstrating expertise in writing comprehensive test.

Full Stack Developer
SocialTek

06/2021 - 06/2022   *Hyderabad*
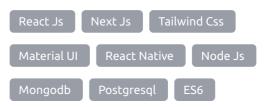

Achievements/Tasks

- Developed and maintained software applications for mobile and web .
